Shorey Extension Increases Activity in Improvements.

Real Estate Men Receiving Many Inquiries.

PREDICT CONGESTION.

Blockades at Kansas Avenue U. P. Crossing

Will Increase When Onaga Cut-Off Is Completed.

The building of the Shorey extension of the Topeka street railway and the prospective completion of the Onaga cut-off are partly responsible for the increased activity in building and improving on the North Side. The optimistic predict that after the street railway extension is finished, Shorey will become a popular suburb of Topeka. The theory is strengthened from the fact that real estate men say since the Shorey line was begun they have been rushed with inquiries as to lots and buildings in that section.

Of course, the street car extension under construction revives the rumor that the Rock Island may transplant its yards from the South Side to Shorey on account of the congestion at the former place, which will increase as business of the road grows.

As to the effect of the completion of the Onaga cut-off, it is thought that as Topeka will be one of the principal stations on the route, and that the line runs through the North Side, the shipping facilities of the First ward will be greatly increased and thus offer advantages to the city.

However, a great worry arises as to what may be done to relieve the constant blockading of the Kansas avenue Union Pacific crossing. Even with the present passenger and freight service the street is often blocked and traffic delayed. The extra service which will be installed with the opening of the cut-off will likely make the situation worse.

While the delay of ordinary traffic is merely inconvenient, the stopping of the fire department from station No. 1, as has happened in the past, by the possible unavailability of the street cars at the crossing, might result in a serious loss in the future. "What can be done to relieve the trouble?" is the question which is discussed a great deal.

Community Comment.
In the story of the firing of a plain drunk the Emporia Gazette says: "What with several of like description, the source of r000, sas-nas-in-7800 query naturally arises as to the source of all this joy-water." The printers must have found the source of the said joy water.

At a summer resort the common expression is: "How I do miss my auto here!" Away from home, the car is nothing like creating an impression of opulence.

It is suggested that Roosevelt be called to arbitrate and settle the reported hen strike. A delinquency of eggs in winter time is almost as much to be dreaded as race suicide.

So far the numerous legal offenses which have occurred in Topeka this year are hours have not been referred to as "the crime wave."

"I may be very unpatriotic and exceedingly un-American, but I can't work up much later over the question whether or not Roosevelt endorses Taft."—Bill Black.

At Colorado Springs, or any other summer resort, it is Mother who is the important personage. It is she who acquires the reputation, lays the traps for eligible bachelors, for her girls and shoes away undesirable acquaintances. As to Father, if he is strong, he merely pays the bills, and tries to be agreeable.

At Manitou, Colo., an eastern man was heard to inform his friends that in Kansas men form a "club" and "sit east for their wives. However, this wretch disappeared before the Kansas men present could lynch him.

A woman from Baltimore traveling through Kansas on a Union Pacific train recently said: "Oh I do wish the train would stop long enough in Kansas for us to hunt up some 'old fashioned' relics." She was told that it would be dangerous to do so as the Indians were liable to scalp people for such actions.

ECONOMIC HINT.
The free folders issued by the railroad companies descriptive of Colorado scenery are just as artistic as the costly hand books.

Notes and Personal.
J. H. Fouch has shaved off his moustache. He says he does this every seven years as the whole body changes in this period and he wishes the development of his physical being to be symmetrical.
